BSc (Hons)

PSYCHOLOGY

3 years full-time - 6 years part-time

(Start dates: September- January)

BSc (Hons)

PSYCHOLOGY

Who is this course for?

The BSc (Hons) Psychology course is for anyone interested in the study of behaviour and mental processes from a variety of theories and psychological perspectives.

What will I get from this programme?

- You will receive a thorough exposure to all aspects of psychological theories and perspectives, from the general to more specific branches within Psychology.
- Your studies will balance critical engagement with theory and research skills, needed for a career as a professional psychologist.

Career Prospects

The BSc (Hons) Psychology offers an excellent start for a career as a professional psychologist, for instance working in the clinical sector, in management, marketing, education, welfare industries, employment services, industrial relations, and media. We have dedicated Career Manager Service offering one-to-one coaching and career advice.

Ways to Study

This programme can be completed either face to face or online, part-time or full-time. By studying with us, you will have access to an innovative e-learning platform, where you can review lecture videos, interact with other students through chat rooms and dedicated forums, and find other course-related materials and readings. The e-learning platform is available to you 24 hours a day, 7 days a week, enabling you to flexibly fit studying into your life.

Programme Structure

Students take a variety of courses in three years, and complete an independent research-based piece of work in the last year. Teaching is a through combination of lectures, seminar, and tutorials.

Courses

Year 1

Is based on introductory modules in the field of psychological theories and research methods, such as:

- Conceptual & historical issues in Psychology
- Introduction to Research Methods
- Cognitive Psychology
- Intermediate Research Methods
- Biological psychology
- Social Psychology

Year 2

Builds upon the knowledge gained in Year 1 and includes:

- Advanced Research Methods
- Developmental Psychology
- Individual differences
- Qualitative Research Methods and clinical interview
- Sociology and Anthropology
- Philosophical Issues in Psychology
- Forensic Psychology

Year 3

Includes a research project, developing valuable transferable skills, as well as 5 modules to be chosen from the following:

- Health psychology
- Psychoanalytic perspectives
- Advanced psychobiology
- Occupational psychology
- Educational psychology
- Individual differences
- Psychology of Sexuality & Gender
- Consciousness and language sciences
- Group dynamics
